## Introduction

Maharshi Parasara taught tens of dasa systems in “Brihat Paaraasara Horaa Saastram”. He only taught the calculations and did not elaborate the purpose and use of each dasa. He probably expected the learners to figure them out. Kaala dasa and Chakra dasa were two of the dasas taught by him. Kaala means “time” and chakra means “wheel”. In this article, we will look into those two dasas.

Kaala dasa and Chakra dasa are both of 120 years and both are based the division of the day into 4 parts. While Kaala dasa is of planets, Chakra dasa is of signs. My view is that these two dasas are to be combined and used together.

It must be clarified that this article is not based on any secret knowledge preserved in a parampara or on any long and extensive research project. Though the calculations presented in this article are based on Parasara’s unambiguous teachings, the judgment of results is based on my insights after meditating on the verses of Parasara and some limited research that followed. When the ideas were tested with a few charts, there were very interesting results. The research was not extensive, but I feel that it is significant enough to share with others. With the limited time I have, I may not be able to do any further justice to these findings. If my findings are recorded, I hope that some keen students of Jyotish will study this research in future and refine the knowledge.

## Four Parts of the Day

These two dasas depend on the division of the day into four parts – (1) morning sandhya (dawn) time, (2) day time, (3) evening sandhya (dusk) time, and (4) night time.

Sunrise is the time when the center of Sun is exactly on the eastern horizon, *i.e.* lagna and Sun are exactly conjoined. Sunset is the time when the center of Sun is exactly on the western horizon, *i.e.* lagna is exactly 180 degrees from Sun. If we divide the time period from sunrise to sunset into six equal parts, the first part belongs to dawn, the next four parts constitute the daytime and the last part belongs to dusk. If we divide the time period from sunset to the next sunrise into six equal parts; the first part belongs to dusk; the next four parts constitute the nighttime; and, the last part belongs to the dawn (of the next day).

Suppose sunrise happens at 6 am and sunset happens at 6pm everyday. Then dawn is from 4 am to 8 am, daytime is from 8 am to 4 pm, dusk is from 4 pm to 8 pm and nighttime is from 8 pm to 4 am.

## Computation of Kaala Dasa

In Kaala dasa, dasas always start with Sun dasa and go as Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rahu and Ketu. There are two cycles of these nine dasas. All the eighteen dasas together give 120 years.

Find the fraction that has elapsed in the portion of the day (dawn or day or dusk or night). The first cycle of nine dasas gives the same fraction of 120 years. Then find the fraction that is yet to come in the portion of the day. The second cycle of nine dasas gives the same fraction of 120 years.

Suppose sunrise is at 6 am and sunset is at 6 pm. Suppose someone is born at 5 pm. Evening sandhya (dusk) starts at 4 pm and lasts till 8 pm. So birth happened in sandhya. The length of this portion of the day is 4 hours. Out of it, 1 hour has elapsed at 5 pm. This is one-fourth of the entire length of the portion of the day (dusk). Then one-fourth of 120 years, *i.e.* 30 years, is the length of the first cycle of nine dasas. The length of the second cycle of nine dasas is 90 years.

In each cycle, the length of the cycle is divided by 45 to get the length of the first dasa of Sun. It is multiplied by 2, 3, 4, 5, 6, 7, 8 and 9 to get the lengths of Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rahu and Ketu dasas (respectively).

**Table 1: Dasa Lengths ( $F$  = length of first cycle in years)**

DASA ORDER	DASA LENGTH IN 1 <sup>ST</sup> CYCLE	DASA LENGTH IN 2 <sup>ND</sup> CYCLE
(1) Sun	$(F / 45)$	$((120-F) / 45)$
(2) Moon	$2 \times (F / 45)$	$2 \times ((120-F) / 45)$
(3) Mars	$3 \times (F / 45)$	$3 \times ((120-F) / 45)$
(4) Mercury	$4 \times (F / 45)$	$4 \times ((120-F) / 45)$
(5) Jupiter	$5 \times (F / 45)$	$5 \times ((120-F) / 45)$
(6) Venus	$6 \times (F / 45)$	$6 \times ((120-F) / 45)$
(7) Saturn	$7 \times (F / 45)$	$7 \times ((120-F) / 45)$
(8) Rahu	$8 \times (F / 45)$	$8 \times ((120-F) / 45)$
(9) Ketu	$9 \times (F / 45)$	$9 \times ((120-F) / 45)$

Let us take the *first* cycle in the above example. The length of the first cycle of nine dasas is 30 years. If we divide it by 45, we get  $2/3$  year. So Sun dasa is of  $2/3$  year, *i.e.* 8 months. Moon dasa is  $2 \times 2/3 = 1 \frac{1}{3}$  year, *i.e.* 1 year 4 months. Mars dasa is  $3 \times 2/3 = 2$  years. Mercury dasa is of  $4 \times 2/3 = 2 \frac{2}{3}$  years, *i.e.* 2 years 8 months. And so on.

Let us take the *second* cycle in the above example. The length of the second cycle of nine dasas is 90 years. If we divide it by 45, we get 2 years. So the dasas of Sun, Moon, Mars, Mercury, Jupiter, Venus, Saturn, Rahu and Ketu are of 2, 4, 6, 8, 10, 12, 14, 16 and 18 years (respectively).

## Computation of Chakra Dasa

If the birthtime is in day time, then dasas start from the sign containing the lagna lord. If the birthtime is in night time, then dasas start from the sign containing lagna. If the birthtime is in sandhya time (dawn or dusk), then dasas start from the sign containing the 2nd house.

**Table 2: Chakra Dasa Start Sign**

<i>PART OF THE DAY</i>	<i>DASA START</i>
<b>Dawn</b>	Sign after the sign containing lagna
<b>Daytime</b>	Sign containing lagna lord
<b>Dusk</b>	Sign after the sign containing lagna
<b>Nighttime</b>	Sign containing lagna

In all cases, dasas go zodiacally and cover the twelve signs. Each dasa is of ten years. The total is 120 years.

**NOTE:** Jagannatha Hora 7.33 (or higher) computes Kaala dasa and Chakra dasa accurately, based on the teachings of Parasara as described in this article.

## **Judgment of Kaala and Chakra Dasas**

Kaala dasa and Chakra dasa are both of 120 years and both are based the division of the day into 4 parts. While Kaala dasa is of planets, Chakra dasa is of signs. My view is that these two dasas are to be combined and used together.

Judge the placement of Kaala dasa planet with respect to the Chakra dasa sign and influences on that planet, to judge the results in a dasa. It seems to show some key events in life well, but not all events. Let us illustrate this with a few examples.

### **Example 1: Rajiv Gandhi**

**Birthdata:** 1944 August 20, 7:12 am (IST), 72e49, 18n58

#### **Events:**

- (1) Became India's Prime Minister in early November 1984.
- (2) Lost power in elections on 1989 November 24.
- (3) Was assassinated on 1991 May 21.

His Kaala dasa calculation is as follows:

#### **Kaala Dasa:**

Sun: 1944-08-20 - 1946-06-05  
Moon: 1946-06-05 - 1950-01-08  
Mars: 1950-01-08 - 1955-05-30  
Merc: 1955-05-30 - 1962-08-08  
Jup: 1962-08-08 - 1971-08-02  
Ven: 1971-08-02 - 1982-05-10  
**Sat: 1982-05-10 - 1994-12-09**  
Rah: 1994-12-09 - 2009-04-21  
Ket: 2009-04-21 - 2025-06-24  
Sun: 2025-06-24 - 2026-05-06  
Moon: 2026-05-06 - 2028-02-02  
Mars: 2028-02-02 - 2030-09-15

Merc: 2030-09-15 - 2034-03-05  
Jup: 2034-03-05 - 2038-07-13  
Ven: 2038-07-13 - 2043-10-04s  
Sat: 2043-10-04 - 2049-11-05  
Rah: 2049-11-05 - 2056-10-22  
Ket: 2056-10-22 - 2064-08-21

Chakra dasa is more straight-forward. Because birth occurred in sandhya time (dawn/dusk), dasas start from the 2<sup>nd</sup> house and go as:

### **Chakra Dasa:**

Vi: 1944-08-20 - 1954-08-20  
Li: 1954-08-20 - 1964-08-20  
Sc: 1964-08-20 - 1974-08-20  
Sg: 1974-08-20 - 1984-08-20  
**Cp: 1984-08-20 - 1994-08-21**  
Aq: 1994-08-21 - 2004-08-20  
Pi: 2004-08-20 - 2014-08-21  
Ar: 2014-08-21 - 2024-08-20  
Ta: 2024-08-20 - 2034-08-21

Cn: 2044-08-20 - 2054-08-21  
Le: 2054-08-21 - 2064-08-21

All the events happened in the Kaala dasa of Saturn and the Chakra dasa of Cp.

At the time of event (1), Saturn was transiting in Li. So Kaala dasa planet was the exalted 1<sup>st</sup> lord in 10<sup>th</sup> from Chakra dasa sign. That can suggest important rise in career.

At the time of event (2), Saturn was transiting in Sg. So Kaala dasa planet was 1<sup>st</sup> lord in 12<sup>th</sup> from Chakra dasa sign. That shows losses.

At the time of event (3), Saturn was transiting in Cp. So Kaala dasa planet is the 1<sup>st</sup> and 2<sup>nd</sup> lord in 1<sup>st</sup> house in marana karaka sthana from Chakra dasa sign. The 8<sup>th</sup> lord of natal rasi chart, Jupiter, aspects him from Cn. This can show death.

## **Example 2: John F Kennedy**

**Birthdata:** 1917 May 29, 4:00 pm (4:00 west of GMT), Brookline, MA, USA (71w7'18", 42n19'54").

### **Events:**

- (1) Elected as US senator in 1952 November.
- (2) Elected as US President on 1960 Nov 8.

Event (1) happened in the Kaala dasa of Rahu and Chakra dasa of Sc. At the time, Rahu was transiting in the 7<sup>th</sup> house from Sc with Jupiter. From Sc, 4<sup>th</sup> lord Rahu and 5<sup>th</sup> lord Jupiter were together in 7<sup>th</sup>. That can give a powerful position. However, there was Guru-Chandala yoga associated with them and her elevation came after the untimely death of India's Prime Minister Lal Bahadur Shastri.

Event (2) happened in the Kaala dasa of Ketu and Chakra dasa of Sg. Ketu is the 12<sup>th</sup> lord from Sg and he was transiting in the 5<sup>th</sup> house at that time and he was in deep gandanta. Transit of 12<sup>th</sup> lord in 5<sup>th</sup> in deep gandanta made her lose power.

Event (3) happened in the Kaala dasa of Sun and Chakra dasa of Cp. At that time, Sun was transiting in the 12<sup>th</sup> house from Cp with Mercury. The 6<sup>th</sup> lord Mercury and 8<sup>th</sup> lord Sun in 12<sup>th</sup> from Cp gives Viparita Raja Yoga. This shows a complete reversal. Her congress party alliance went up from 88 seats to 374 seats, while the ruling Janata party alliance slipped from 228 seats to mere 34 seats. This was a complete reversal.

Though Reagan swept the state of Tennessee, Al Gore had a convincing victory.

Event (3) happened in the Kaala dasa of Saturn and Chakra dasa of Ar. At that time, Saturn was transiting in own sign in Cp, in the 10<sup>th</sup> house from Ar. This can show good rise in career.

## Extending to Divisional Charts

Chakra dasa can be calculated based on various divisional charts instead of rasi chart. One can use lagna or lagna lord or 2<sup>nd</sup> house in a *divisional chart* as the seed and find Chakra dasa. Rasi chart transit of Kaala dasa planet with reference to the divisional chart based Chakra dasa sign seems to suggest the main event in the area of life shown by that divisional chart. We will see some examples related to navamsa.

Event (1) happened in the Kaala dasa of Mercury and the Chakra dasa of Cp. At the time, Mercury was transiting in Cn. So the Kaala dasa planet was the 9<sup>th</sup> lord transiting in the 7<sup>th</sup> house, from the Chakra dasa sign. It explains marriage.

Event (2) happened in the Kaala dasa of Jupiter and the Chakra dasa of Pi. At the time, Jupiter was transiting in Li. So the Kaala dasa planet was the 1<sup>st</sup> lord transiting in the 8<sup>th</sup> house of death or divorce, from the Chakra dasa sign. It explains divorce.

Event (3) happened in the Kaala dasa of Jupiter and the Chakra dasa of Pi. At the time, Jupiter was transiting in Sc with Mars and Mercury. So the Kaala dasa planet was the lagna lord transiting in the 9<sup>th</sup> house of dharma with a close conjunction with 7<sup>th</sup> and 9<sup>th</sup> lords, from the Chakra dasa sign. It can explain marriage.

### **Conclusion**

Some of my findings on Kaala dasa and Chakra dasa were outlined for the benefit of students and researchers. It is hoped that interested researchers will put this knowledge to use and possibly refine it in future. If you do not find this knowledge useful, please ignore it. If you find it useful, please feel to use it, refine it and spread it. There is a lot of knowledge in BPHS that still needs to be understood and refined.
